FOREWORD

The Missouri Division of Alcohol and Drug Abuse is pleased to present this eighth edition of the *Status Report on Missouri's Alcohol and Drug Abuse Problems*.

The report quantifies the use of alcohol, tobacco, and other drugs in Missouri and highlights some of the consequences of the abuse of these substances as reported by a variety of public entities. It also summarizes the substance abuse services provided by agencies that have contracts with the Division of Alcohol and Drug Abuse.

All editions of the *Status Report on Missouri's Alcohol and Drug Abuse Problems* are available to review in most Missouri public and university libraries, and in the regional offices of the Division of Alcohol and Drug Abuse. The regional offices are located in Kansas City, St. Louis, Springfield, Columbia, Rolla, and Poplar Bluff. Inquiries pertaining to this publication should be directed to the Division's Research and Statistics unit.

Sincerely,

Michael Couty

MC/ts

SPECIAL ACKNOWLEDGEMENT

The Missouri Division of Alcohol and Drug Abuse would like to acknowledge the contribution of Donna Nelson, Program Coordinator, Research and Statistics, for this document.

Donna Nelson has faithfully served the Division of Alcohol and Drug Abuse for eight years. Her dedication to the Division, the Department of Mental Health, and the consumers we serve has been constant. Her steadiness, vision for her work, and conscientiousness are appreciated.

ACKNOWLEDGMENTS

The Missouri Division of Alcohol and Drug Abuse would like to recognize individuals from other agencies who contributed data for this publication. The Division is grateful for the special programming these administrators and analysts developed to extract the data needed to meet the report's criteria.

INTRODUCTION

The *Status Report on Missouri's Alcohol and Drug Abuse Problems* is issued annually by the Missouri Department of Mental Health, Division of Alcohol and Drug Abuse. The primary purpose of this report is to provide policy makers, planners, service providers, and researchers with a broad set of quantifiable measures and indicators of substance use, abuse, and addiction in Missouri.

Substance abuse is classified as a mental health disorder and includes both the abuse of, and dependence on, alcohol and other drugs. An estimated 26.6 percent of the U.S. population 15-54 years of age experiences some type of substance abuse in their lifetimes. Within a single year, 6.6 percent of the population has a substance abuse problem and an additional 4.7 percent has co-occurring substance abuse and mental disorders (64) (*see References, page 342*). Missouri's most recent needs assessment indicates that 378,000 Missouri adults over age 18 need alcohol or drug abuse treatment and 114,000 adolescents 12-17 years of age need intervention or treatment (43, 44).

Many of the substance abuse measures and indicators presented in this report are used by other substance abuse authorities, including the Substance Abuse and Mental Health Services Administration, the National Institutes of Health, the Centers for Disease Control and Prevention, and the Robert Wood Johnson Foundation (46, 50, 56, 58, 64). Some of the data are direct measurements of substance abuse events, such as drunk driving crashes. Others are indicators that have a statistical correlation to substance abuse and may precede, follow, or not be associated with substance use or abuse in specific cases. Alcohol and other drug abuse typically have a profound impact on quality of life factors such as family relations, employment, health, housing, and legal status. Therefore, a broad array of data must be presented to quantify these impacts.

Health problems associated with substance abuse include prenatal exposure to alcohol and other drugs, sometimes resulting in lifelong impairments; medical emergencies from overdoses and toxic reactions; and chronic diseases resulting in several of the leading causes of death. Public safety is compromised through alcohol and drug related traffic crashes and a variety of non-traffic accidents resulting from intoxication. Substance abuse is related to low educational achievement, unemployment, poverty, crime, and violence. It also contributes to interpersonal conflict, family disintegration, and emotional suffering. Victims of violence are more likely to be seriously injured if their perpetrators have consumed alcohol and/or other drugs (67). One-half of perpetrators of domestic violence are believed to have alcohol or drug addiction problems, and an estimated 80 percent of child abuse cases involve parental substance abuse (61).

According to recent estimates, the national indirect costs of substance abuse were \$184.6 billion for alcohol abuse in 1998, \$116.9 billion for drug abuse in 1997, and \$130 billion for cigarette smoking in 1998. These costs totaled \$431.5 billion for the United States. Missouri's estimated share of this burden was over \$8.6 billion, with annual costs of almost \$1,600 per Missouri resident (54, 60, 68). These costs include loss of productivity due to substance abuse related illnesses and deaths, motor vehicle crashes, fire destruction, crime, fetal alcohol syndrome, acquired immune deficiency syndrome (AIDS), and the treatment and support of people with substance abuse problems.

These high monetary and social costs can be reduced. The federal Center for Substance Abuse Treatment (CSAT) has compiled studies from several states and corporations documenting substantial cost savings from substance abuse treatment, large reductions in crime, and other benefits (61, 62). Many people who seek help for substance abuse finance their treatment services or have insurance coverage. For those unable to afford services, publicly funded programs are necessary. The public sector's share of total treatment expenditures has been increasing in recent years, climbing from 53 percent in 1987 to 64 percent in 1997 (60).

The Missouri Division of Alcohol and Drug Abuse is responsible for the provision of publicly funded services that utilize state and federal funds. Annual surveys of Missouri treatment facilities indicate that the publicly supported programs serve approximately three-fourths of all treatment clients (66). Therefore, of the 492,000 Missouri residents (378,000 adults and 114,000 adolescents) who need treatment or intervention services, a projected 369,000 are expected to require public support. In fiscal year 2001, 40,035 clients received services in treatment programs funded by the Division of Alcohol and Drug Abuse (24). An additional 10,594 were served in clinical intervention programs as a result of substance abuse related traffic offenses. These 50,629 clients comprise less than 14 percent of the 369,000 who need the Division's services. Thus, the vast majority of the Missouri substance abuse population is unserved. In fiscal year 2001, new admissions to Division of Alcohol and Drug Abuse treatment programs totaled 42,294 -- including 2,249 who sought counseling due to a family member's substance abuse and 258 who indicated their primary problem was gambling. The remaining 39,787 entered treatment for a primary problem of substance abuse or dependency (23). Most of the admissions data in this report summarizes the characteristics of the substance abuse/dependency clients.

The broadest arrays of measures, indicators, and treatment admissions in this report are presented on a statewide level of analysis. To illustrate trends, data tables and charts include counts or rates from the past several years when available. To facilitate regional planning, data is provided for each of the Division of Alcohol and Drug Abuse administrative regions and service areas. An illustration of these regions and service areas is included in the Appendix of this report. Data on Missouri's 115 counties is provided to assist local planning. Several tobacco issues have emerged during the past few years. A separate section summarizes the current status of tobacco regulation and use in Missouri.

Alcohol and drug related deaths and hospitalizations are quantified based on International Classification of Diseases (ICD) coding. Mortality data began being coded using ICD-10 in 1999, resulting in a change in the complex set of rules for selecting the single underlying cause of death from among several interrelated causes. Aside from the code changes, the methodology that derives estimates of the number of alcohol, drug, and tobacco deaths that should be attributed to the new codes is also undergoing revision. As a result, some death estimates are not yet available, and those that are available cannot be directly compared to pre-1999 estimates.

HIGHLIGHTS

New Department Strategic Plan Addresses Substance Abuse Prevention

- A new Missouri Department of Mental Health Strategic Plan was developed in 2001 (22). The plan places a high priority on the prevention of substance abuse and other mental health problems. Key objectives for the Division of Alcohol and Drug Abuse are to delay onset of use of alcohol and other drugs by Missouri youth and to reduce binge drinking among college students. Baseline rates for these objectives were established in 2001. Based on the Missouri 2000 Student Survey, the average age of first use of alcohol among Missouri youth in grades 6, 8, 10, and 12 is 12.77 years of age. The average age of first use of cigarettes is 12.18 years, and the average age of first marijuana use is 13.63 years. Through prevention programming, the Division's goal is to increase these average ages of first use over the next several years. According to a survey conducted at ten public colleges and universities in Missouri in 2001, 47.6% of the students surveyed consumed at least five alcoholic drinks on a single drinking occasion at least once during the two weeks preceding the survey. Through targeted programs, the Division will be attempting to reduce the percentage of students who are binge drinkers and the frequency of binge drinking.

New Data on Alcohol and Drug Abuse Released in 2001

- Preliminary data from the 2001 Missouri Youth Risk Behavior Survey (YRBS), conducted by the Missouri Department of Elementary and Secondary Education, provides information on the use of alcohol and other drugs by Missouri high school students (7). Some of the findings are:
 - ◆ In 2001, 47.6 percent of students in grades 9-12 drank alcohol in the 30 days preceding the survey and were defined as current drinkers. This prevalence rate was a decrease from the 1999 rate of 49.9 percent. Drinking rates for high school seniors decreased five percentage points, dropping from 57.2 percent in 1999 to 52.2 percent in 2001. Nationally, 49.8 percent of high school seniors were current drinkers in 2001, based on the Monitoring the Future Survey. Missouri high school juniors showed the biggest decline in drinking, dropping seven percentage points to 48.4 percent.
 - ◆ The percentage of Missouri high school students engaging in binge drinking increased. Binge drinking in the YRBS is defined as consuming five or more drinks in a row, or within a couple of hours, during the 30 days preceding the survey. Binge drinking rates for grades 9-12 increased from 32.0 percent in 1999 to 34.1 percent in 2001, despite the decrease in the percentage of students who used any alcohol in the preceding 30 days. The ratio of binge drinking to any current drinking was highest for juniors and seniors at 75.4 percent and 76.6 percent, respectively. Binge drinking during the *30 days* preceding the Missouri survey was reported by 40.0 percent of Missouri high school seniors. Nationwide in 2001, 29.7 percent of seniors reported binge drinking during the shorter period of *two weeks* specified in the national survey.
 - ◆ In Missouri, current cigarette smoking among students in grades 9-12 decreased from 32.8 percent in 1999 to 30.3 percent in 2001. The decrease was mainly attributable to high school juniors. In 1999, 38.1 percent of students in eleventh grade reported that they

were smokers. In 2001, the percentage dropped to 29.6 percent. Cigarette smoking among Missouri high school seniors increased from 33.5 to 35.4 between 1999 and 2001. Nationally, 29.5 percent of seniors were smokers in 2001. Smokeless tobacco use increased between surveys. In 2001, 10.4 percent of Missouri high school students reported current use of smokeless tobacco products. The rate varied little between grades but was highest for sophomores. Among seniors, current smokeless tobacco use is 10.2 percent, compared to 7.8 percent of seniors nationwide.

- ◆ Marijuana use among Missouri high school students decreased slightly between the surveys, with current use declining from 25.6 percent in 1999 to 24.4 percent in 2001. As with cigarette smoking, high school juniors showed the largest reduction in use, dropping from 31.8 percent to 24.8 percent. Use among high school seniors was virtually unchanged at 24.6 percent. Nationally, 22.4 percent of seniors were current marijuana users in 2001. Missouri high school freshmen presented the most notable use rate for marijuana, increasing 3.5 percentage points to 25.8 percent and surpassing the 24.4 percent rate for all high school grades combined.
 - ◆ High school student cocaine use increased from 2.7 percent in 1999 to 3.4 percent in 2001 in Missouri. Seniors had the highest percentage of users at 4.8 percent and exceeded the 2001 national rate of 2.1 percent. Among Missouri sophomores, 1.6 percent used cocaine in the 30 days preceding the 2001 survey, higher than the 2001 national rate of 1.3 percent for tenth grade students.
- In 2000, cigarette smoking among Missouri adults ages 18 and older remained virtually unchanged at 27.2 percent, but Missouri's ranking among all states climbed from sixth to third. Only Kentucky and Nevada have a higher percentage of smokers among the adult population (51).
 - Per capita alcohol consumption among the Missouri population ages 14 and older increased from 2.18 gallons of ethanol to 2.21 gallons in 1998, the year of the most recent available data (53). The increase pushed Missouri above the national per capita consumption rate of 2.19 gallons.
 - Domestic violence reports dropped sharply from 41,215 in 1999 to 37,898 in 2000, an eight percent decrease (31). The 2000 count was 14 percent below the record 44,090 domestic violence reports in 1997.
 - Substance abuse during pregnancy continued to decrease.
 - ◆ The reported number of mothers of newborns who drank during their pregnancies continued a multi-year decline (15). In 2000, maternal alcohol consumption during pregnancy was reported for 548 newborns, compared to 619 in 1999. However, maternal alcohol consumption continues to be under-reported.
 - ◆ The reported number of mothers of newborns who smoked during their pregnancies increased from 13,766 in 1999 to 13,955 in 2000, but the reported rate remained unchanged at 18.3 percent (15).
 - ◆ Reported newborns affected by maternal consumption of illicit drugs decreased from 263 births in 1999 to 255 in 2000 (17). Reported cocaine affected births decreased but the number of newborns affected by hallucinogens, principally PCP, increased. Deleterious newborn exposure to illicit drugs is known to be under-reported.

- The dropout rate for high school students in grades 9-12 decreased from 5.4 percent in 2000 to 5.1 percent in 2001 (10). The 2001 rate was the lowest it has been since the 1989-90 school year.
- Reported cases of Hepatitis C are increasing rapidly in Missouri. Missouri recorded 4,884 cases in 2000, compared to 2,474 in 1999 (20). Many are chronic cases, with exposure originating in earlier years, which have gone undetected or unreported. The National Institute on Drug Abuse estimates that 60 percent of Hepatitis C cases result from injection drug use (57).
- Deaths for medical conditions with an underlying cause of substance abuse totaled 656 in 2000, a decrease from the 679 deaths recorded in 1999 (16). Alcohol related deaths declined from 394 to 324, while drug related deaths increased from 285 to 332.
- In 2000, alcohol related traffic crashes totaled 8,417, a small increase from the 8,381 reported in 1999 (34). This was the first year-to-year increase since 1990, when Missouri recorded 10,910 traffic crashes involving alcohol. This marked the first time in the last decade that the rate of alcohol related crashes per 100,000,000 miles of vehicle travel also increased, from 12.54 in 1999 to 12.58 in 2000. The number of alcohol involved fatal crashes and number of fatalities also increased in 2000 (36).
- Drug related crashes also increased in 2000, climbing from 645 in 1999 to 785 in 2000. The number of people killed in traffic crashes involving drugs was 38, the highest number reported in the past decade (35, 37).
- Law enforcement activity directed at clandestine methamphetamine labs continued to increase. The Missouri State Highway Patrol, the Department of Public Safety's Drug Task Forces, and the U.S. Drug Enforcement Administration reported a total of 1,873 operations involving methamphetamine labs, an increase from 1,679 the previous year (39). Due to joint participation in some of the operations, the number of labs dismantled was fewer than the number of reports.
- In FY2001, a total of 4,293 people entered state prisons due to drug offenses, an increase from 4,014 in FY2000. The total includes new admissions and readmissions. At the end of FY2001 5,907 inmates were in custody for drug offenses and 1,184 for driving while intoxicated. These 7,091 substance abuse offenders comprised one-fourth of all prison inmates (1, 2, 3).
- Admissions to Division of Alcohol and Drug Abuse programs for substance abuse and addiction treatment totaled 39,787 in fiscal year 2001 (23).
 - ◆ Treatment admissions for phencyclidine (PCP) reached 187, a 52 percent increase from fiscal year 2000 admissions and twice the 94 PCP admissions in fiscal year 1999.
 - ◆ Among the widely used drugs, marijuana and methamphetamine posted the largest increases in admissions between fiscal years 2000 and 2001 — 7.7 percent and 7.1 percent, respectively. Cocaine admissions increased 4.3 percent and heroin admissions were unchanged. Alcohol continued to be the primary drug of abuse, and the 16,508 admissions in fiscal year 2001 were a 2.6 percent increase over fiscal year 2000 alcohol admissions.

YOUTH AND TOBACCO IN MISSOURI

Youth Access Laws

- ***No tobacco sales to persons under age 18:*** Missouri state law prohibits the selling of tobacco products to anyone under the age of 18 years. Merchants are also required to post a state law sign at every tobacco display, including cigarette machines. (*Missouri State Statute 407.926-407.927*)
- ***New State Legislation Effective August 28, 2001:*** New legislation makes the Department of Public Safety—Division of Liquor Control responsible for the enforcement of the state's laws related to the control and sale of tobacco and requires the division to submit an annual report on the effectiveness of cigarette control laws to the General Assembly. By January 1, 2002, vending machines will be required to be equipped with a device that disables them until unlocked by a sales person. Vending machines located in areas where patrons must be over the age of 18 or in places not generally accessible to the general public are exempted from this requirement. In addition, it will be illegal for a person under the age of 18 to purchase, attempt to purchase, or possess tobacco products unless in the course of employment. Persons under the age of 18 will have their tobacco products confiscated. The new law outlines penalties for persons in violation of this provision. Persons who sell cigarettes will be required to have a retail sales tax license and to be registered with the Department of Revenue to sell tobacco products in the state. The Department of Revenue will be required to make available to the Division of Liquor Control and the Department of Mental Health a list of establishments registered to sell tobacco products in the state. (*Missouri State Statute 407.925-407.935*)
- ***Federal Regulation:*** Federal SYNAR regulation, administered by the US Department of Health and Human Services, requires all states to establish laws that make it unlawful to sell or distribute tobacco products to any individual under the age of 18 years and to enforce such laws in a manner that can reasonably be expected to reduce youth access to tobacco products. It also requires states to annually measure compliance through random, unannounced inspections. All states are expected to achieve a violation rate of no more than 20 percent. (42 U.S.C. 300x-26 and 45 C.F.R. 96.130)

Current Status

- ***Youth Lifetime Use:*** Over 75 percent of Missouri high school students surveyed reported having tried cigarette smoking. (*2001 Youth Risk Behavior Survey*.)
- ***Premature Deaths:*** The CDC projects that 119,057 Missouri youths will die prematurely from their smoking. (*CDC Investment in Tobacco Control State Highlights 2001*).¹
- ***Youth Current Use:*** In 2001, 35.4 percent of Missouri high school seniors reported current use of cigarettes, up somewhat from 33.5 percent in 1999 but down from a high of 48.2 percent in 1997. For most of the 1990's, the rate of current cigarette use among Missouri high school seniors had been considerably higher than the corresponding rate for the nation as a whole. (*2001 Youth Risk Behavior Survey; 2001 Monitoring the Future Survey*)

¹ Centers for Disease Control and Prevention. Investment in Tobacco Control State Highlights 2001. Atlanta, GA http://www.cdc.gov/tobacco/statehi/statehi_2001.htm

- Merchant Compliance:** In 2001, an estimated 16.7 percent of Missouri merchants unlawfully sold cigarettes and smokeless tobacco to individuals under the age of 18 years—up slightly from the previous year's rate of 15.3 percent. This increase was expected, however, due to the change in the ages of the minors used in the inspections. As instructed by the Missouri legislature, no minors under the age of 16 were used in the 2001 inspections. For the past two years, the State has realized a non-compliance rate below the long-term Synar target rate of 20%. The State has used a combination of law enforcement and merchant education activities in order to bring down the non-compliance rate from a high of 40 percent (baseline year) to a rate less than the 20 percent target rate. (*FFY 2002 Substance Abuse Block Grant Application*)

State Initiatives Aimed at Youth Tobacco Access

- Lawsuit against three retailers:** In May 2000, the Missouri Attorney General filed suit against three tobacco retailers (7-Eleven, Walgreen, and Discount Smoke Shop) alleging their rate of sales to minors is well above the state average.² In February 2001, Discount Smoke Shop agreed to pay a civil penalty of \$3,000 and claims for the Attorney General's costs of investigation and prosecution. In June 2001, Walgreen agreed to pay a civil penalty of

\$11,500 to the state and \$34,500 to the state to cover the cost of investigating and prosecuting the case. Included in the judgment and agreement were provisions to 1) implement an employee training program, 2) check IDs for any tobacco purchaser appearing to be under the age of 27, and 3) display signage at all tobacco displays.³ At this time, the case involving 7-Eleven remains unresolved.

- **Law Enforcement Surveillance:** In FFY 2001, the Missouri Department of Mental Health - Division of Alcohol and Drug Abuse (DMH-ADA) contracted with local enforcement agencies to provide enforcement of the State's law prohibiting retail sale of tobacco products to minors. Local enforcement agencies in the following areas were involved in this effort: Kansas City, Poplar Bluff, Independence, St Joseph, St Louis, Springfield, West Plains, Branson, Florissant, and Jefferson City. Surveillance activities were conducted from February 2001 through August 2001. State law and, in some jurisdictions, local ordinances were enforced. A surveillance event was not to exceed one hour, but a tobacco outlet could receive multiple surveillance visits. Surveillances were to be conducted during times when underage tobacco purchases are most likely to occur (i.e. during lunch, after school hours, weekends, etc.) A total of 20 citations and 10 warnings were issued for illegal sale or distribution of tobacco to a minor. A total of 90 citations and 86 warnings were issued for tobacco warning sign violations. A total of 13 warnings were issued for improper location of a vending machine. A total of 3 warnings were issued for failure to verify proof of age. A total of 3 citations and 2 warnings were issued for minor in possession of tobacco. A total of 4 warnings were issued for improper location of a tobacco display. One warning was issued for illegal distribution of free samples of tobacco. One warning was issued for tobacco advertisement violation. DMH-ADA paid \$618,499.50 for these surveillance activities.
- **Portion of Tobacco Settlement Money to go to Tobacco Prevention and Cessation Programs:** The 2001 Missouri legislature agreed on a plan on how to spend the State's tobacco settlement money by approving the Healthy Family Initiative. For FY 2002, \$22.2 million will be allocated for a comprehensive tobacco prevention plan to help communities develop their own anti-smoking education programs and to fund a statewide media campaign against smoking.⁴

Merchant Education Program: During 2001, the Department of Mental Health—Division of Alcohol and Drug Abuse (DMH-ADA) initiated a comprehensive merchant education program that included (*FFY 2002 Substance Abuse Block Grant Application*):

- **Outlet visits:** During the month of February 2001, the DMH-ADA prevention network made phone contact with 5,234 outlets that sell tobacco products. The purpose of these phone contacts was to
 - Provide information regarding the state's law on youth access to tobacco products,
 - Identify outlets that no longer sell tobacco or are out of business, and
 - Update outlet name and address information in the listing of known tobacco outlets maintained by DMH-ADA.

From March 2001 through July 2001, the prevention teams conducted walk-in visits to the previously identified tobacco retailers in the state. In addition, new businesses that

⁴ *Holden says Tobacco Funds Key to Reducing Smoking in Missouri.* News Release: July 11, 2001
<http://www.gov.state.mo.us/press/press071101.htm>

sell tobacco products were identified and visited. Tobacco retailers received up to five visits during this time period. During these visits, informational brochures, tobacco signs, and calendars were given to employees. In total, 25,225 walk-in visits were conducted in which contact was made with the storeowner, manager, and/or other employees and merchant education materials were distributed. Owner contacts numbered 1,909. Manager contacts numbered 8,197. Over 5,400 outlets received at least one visit. DMH-ADA allocated \$330,000 for merchant education activities including phone calls and walk-in visits.

- **Signage Checks:** From August 23, 2000 to April 6, 2001, five Health Representatives employed with DMH-ADA conducted site visits to the tobacco retailers in the State. During a visit, a check was made to determine if proper signage was displayed as required by the State's law. The inspectors made 2,347 site visits to tobacco retail outlets. Of these visits, 1,248 were found to be non-compliant, 804 were found to be compliant, and 354 were 'unable to complete.' Follow-up letters were mailed to the owners/managers of the establishments. A total of 735 non-compliant and 674 compliant letters were mailed.
- **Youth-Attempt-To-Purchase Checks (includes Synar checks):** Since April 2001, compliance checks are being conducted in which a youth age 16 or 17 attempts to purchase a tobacco product. If the mode of purchase is over-the-counter, the event is considered a successful unconsummated buy if the retail clerk fails to request ID or the age of the youth prior to requesting payment for the tobacco product and fails to deny the sale. If the mode of purchase is vending machine, the event is considered a successful unconsummated buy if the youth is able to insert a quarter into the vending machine and leave the premises without intervention by store employees whereby they request ID or the age of the youth. During these checks, the youth inspectors purchase no tobacco products. If the check results in a successful (unconsummated) buy, the clerk receives a warning card. The check is followed-up by a warning letter to the owner/manager generally within two weeks of the check. If the store employee requests ID and/or the age of the youth, then the store employee is given a congratulatory card. These checks are followed up with a congratulatory letter to the owner/manager of the retail establishment. From April 5, 2001 through July 9, 2001, there were 1,401 checks (including Synar checks.) Of these checks, 245 (17.49%) resulted in the issuance of warning cards. Mailings of the follow-up letter to the owner/manager began on June 6, 2001. During this period, 94 warning letters and 484 congratulatory letters were mailed to tobacco retailers as a result of the checks.
- **Media campaign:** Merchant education using mass media included use of billboards, theatre screens, and radio spots. DMH-ADA purchased use of billboard displays along major highways and interstates throughout the state. Thirty-seven locations were used for the period of July through September 2001. The display featured the message "Under 18? No tobacco. It's the law" in white lettering with a red background. Total investment for the billboard display was \$150,000. Use of theatre screen ads was purchased at \$20,482.50 (including production) for a 10-week run. These theatre screen ads ran in 11 theatres in Kansas City (66 screens), 1 theatre in Sikeston (3 screens), and 12 theatres in the St Louis area (74 screens). Merchant education messages also ran on MissouriNet, a statewide news network covering over 60 radio stations across the state. Investment in radio advertisements was \$85,000.

DIVISION OF ALCOHOL AND DRUG ABUSE SERVICES

The Division of Alcohol and Drug Abuse supports an array of prevention, intervention, and treatment services. In the state fiscal year 2001 (July 1, 2000 through June 30, 2001), the Division of Alcohol and Drug Abuse contracted with service providers for substance abuse detoxification, residential and outpatient treatment, compulsive gambling counseling, and traffic offender services. Major funding sources for these programs are from federal Substance Abuse Prevention and Treatment block grant funds, federal and state Medicaid payments, Missouri general revenue, Compulsive Gambling funds, and Health Initiative funds.

The Division maintains a comprehensive prevention system based on a risk and protective factor framework. The Division's two strategic goals for prevention are (1) delaying onset of substance use and (2) reducing the incidence and prevalence of binge drinking among college-age youth. The Division's focus for prevention includes implementing an array of science-based programs in public schools and communities and building the capacity of coalitions to address local substance use issues. The prevention system includes contracted services for coalition capacity building, community-based alternatives and services for high-risk youth, and school-based prevention and intervention services. In addition, the Division partners with other state agencies to provide a continuum of prevention services throughout the state.

Thousands of motorists are arrested each year for driving under the influence of alcohol or other drugs (DWI/DUI). The Division coordinates the Substance Abuse Traffic Offenders' Program (SATOP), which assesses each offender and provides one of several types of educational or clinical services. By statute, participation in SATOP is required for drivers license reinstatement. In fiscal year 2001, 32,289 Missouri residents were referred to SATOP as a result of an administrative suspension or revocation of their driver's license, court order, condition of probation, or plea bargain.

The Division administers treatment services through contracts with a network of treatment facilities. In fiscal year 2001, the Division recorded 42,294 new client admissions to these programs – 39,787 for substance abuse/dependency services, 2,249 for codependency services, and 258 for compulsive gambling counseling (23). A total of 50,629 people received intervention or treatment services (24). General treatment services were provided to 24,795. The Comprehensive Substance Treatment and Rehabilitation (CSTAR) program served 15,240. The CSTAR program provides intensive outpatient treatment and has components tailored for women, adolescents, and the general adult populations. Clinical services were provided to 10,594 SATOP clients. Of these clients, 6,093 attended Weekend Intervention Programs (WIP), 4,265 attended Clinical Intervention Programs (CIP), and 236 attended Youth Clinical Intervention Services (YCIP).

Some clients need access to a stable, drug-free living environment after attaining sobriety. To facilitate their recovery, the Division coordinates 57 self-run, self-supported Oxford Houses with a capacity of 416 residents. Of these, there are 46 houses for men, ten for women, and one for women and their children. The Division also provides services to individuals with compulsive gambling problems. In fiscal year 2001, the Division provided outpatient gambling counseling to 258 clients.

CONCLUDING REMARKS

The use and misuse of legal and illegal drugs and substances, like other disorders, is a deeply entrenched aspect of our society. Many consequences of substance abuse are quantified in this report. Some events chiefly burden the substance abusers and their families. Others have the potential to suddenly and intractably affect the lives of any of us as unsuspecting victims. Although the societal costs of substance abuse are quantified in economic and statistical terms, personal costs are less tangible. They include broken dreams, potentials never reached, conflict, emotional grief, injury, illness, and death.

Substance abuse is treatable, and thousands of people escape its grip every year by accessing specialized treatment and intervention services. Many other at-risk individuals avoid involvement in substance abuse through prevention services that address environmental hazards and individual needs. Treatment is cost-effective. The federal Center for Substance Abuse Treatment (CSAT) has compiled studies from a number of states and corporations documenting substantial cost savings from substance abuse treatment, and large reductions in crime. In contrast to the huge annual per capita direct and indirect monetary costs of substance abuse, CSAT estimates that a full continuum of services to treat addictive disorders would cost every American only \$45 per year (61).

A vision of the Missouri Department of Mental Health is that "Missourians shall be free to live their lives and pursue their dreams beyond the limitations of mental illness, developmental disabilities, and alcohol and other drug abuse." One of our challenges is to provide services to those who need our help in order to overcome substance abuse problems. Reducing the impact of alcohol and drug abuse can improve the quality of life for everyone in Missouri.

=> *Italicized* percentages in 1999 data are different than reported in previous edition of Status Report due to revision of estimates by SAMHSA.

=> 1999 and 2000 data are not directly comparable to earlier years due to use of a computer-assisted instrument that replaced the paper-and-pencil surveys.

=> A new age group for analysis – 26 and Older – was introduced in 1999.

* "Binge" alcohol use in the National Household Survey is defined as consuming 5 or more drinks on the same occasion on at least one day in the past 30 days.

** "Heavy" alcohol use is defined as consuming 5 or more drinks on the same occasion on each of 5 or more days in the past 30 days.

*** Low precision; no estimate reported.

¹ County totals for HIV and AIDS do not include persons living in correctional facilities and institutions at the time of diagnosis. Cumulative HIV cases may show declines from prior years due to their reclassification as AIDS cases.

² 1999 and 2000 data in this category are not comparable to prior years due to changes in rules for selecting and classifying causes of death.

Statewide, regional, county, and category totals may not match due to non-inclusive categories, incomplete data, and services to Missouri non-residents.

¹ County totals for HIV and AIDS do not include persons living in correctional facilities and institutions at the time of diagnosis. Cumulative HIV cases may show declines from prior years due to their reclassification as AIDS cases.

² 1999 and 2000 data in this category are not comparable to prior years due to changes in rules for selecting and classifying causes of death.

Statewide, regional, county, and category totals may not match due to non-inclusive categories, incomplete data, and services to Missouri non-residents.

¹ County totals for HIV and AIDS do not include persons living in correctional facilities and institutions at the time of diagnosis. Cumulative HIV cases may show declines from prior years due to their reclassification as AIDS cases.

² 1999 and 2000 data in this category are not comparable to prior years due to changes in rules for selecting and classifying causes of death.

Statewide, regional, county, and category totals may not match due to non-inclusive categories, incomplete data, and services to Missouri non-residents.

¹ County totals for HIV and AIDS do not include persons living in correctional facilities and institutions at the time of diagnosis. Cumulative HIV cases may show declines from prior years due to their reclassification as AIDS cases.

² 1999 and 2000 data in this category are not comparable to prior years due to changes in rules for selecting and classifying causes of death.

Statewide, regional, county, and category totals may not match due to non-inclusive categories, incomplete data, and services to Missouri non-residents.

¹ County totals for HIV and AIDS do not include persons living in correctional facilities and institutions at the time of diagnosis. Cumulative HIV cases may show declines from prior years due to their reclassification as AIDS cases.

² 1999 and 2000 data in this category are not comparable to prior years due to changes in rules for selecting and classifying causes of death.

Statewide, regional, county, and category totals may not match due to non-inclusive categories, incomplete data, and services to Missouri non-residents.

¹ County totals for HIV and AIDS do not include persons living in correctional facilities and institutions at the time of diagnosis. Cumulative HIV cases may show declines from prior years due to their reclassification as AIDS cases.

² 1999 and 2000 data in this category are not comparable to prior years due to changes in rules for selecting and classifying causes of death.

Statewide, regional, county, and category totals may not match due to non-inclusive categories, incomplete data, and services to Missouri non-residents.

¹ County totals for HIV and AIDS do not include persons living in correctional facilities and institutions at the time of diagnosis. Cumulative HIV cases may show declines from prior years due to their reclassification as AIDS cases.

² 1999 and 2000 data in this category are not comparable to prior years due to changes in rules for selecting and classifying causes of death.

Statewide, regional, county, and category totals may not match due to non-inclusive categories, incomplete data, and services to Missouri non-residents.

- ¹ County totals for HIV and AIDS do not include persons living in correctional facilities and institutions at the time of diagnosis. Cumulative HIV cases may show declines from prior years due to their reclassification as AIDS cases.
- ² 1999 and 2000 data in this category are not comparable to prior years due to changes in rules for selecting and classifying causes of death.

Statewide, regional, county, and category totals may not match due to non-inclusive categories, incomplete data, and services to Missouri non-residents.

¹ County totals for HIV and AIDS do not include persons living in correctional facilities and institutions at the time of diagnosis. Cumulative HIV cases may show declines from prior years due to their reclassification as AIDS cases.

² 1999 and 2000 data in this category are not comparable to prior years due to changes in rules for selecting and classifying causes of death.

Statewide, regional, county, and category totals may not match due to non-inclusive categories, incomplete data, and services to Missouri non-residents.

¹ County totals for HIV and AIDS do not include persons living in correctional facilities and institutions at the time of diagnosis. Cumulative HIV cases may show declines from prior years due to their reclassification as AIDS cases.

² 1999 and 2000 data in this category are not comparable to prior years due to changes in rules for selecting and classifying causes of death.

Statewide, regional, county, and category totals may not match due to non-inclusive categories, incomplete data, and services to Missouri non-residents.

¹ County totals for HIV and AIDS do not include persons living in correctional facilities and institutions at the time of diagnosis. Cumulative HIV cases may show declines from prior years due to their reclassification as AIDS cases.

² 1999 and 2000 data in this category are not comparable to prior years due to changes in rules for selecting and classifying causes of death.

Statewide, regional, county, and category totals may not match due to non-inclusive categories, incomplete data, and services to Missouri non-residents.

¹ County totals for HIV and AIDS do not include persons living in correctional facilities and institutions at the time of diagnosis. Cumulative HIV cases may show declines from prior years due to their reclassification as AIDS cases.

² 1999 and 2000 data in this category are not comparable to prior years due to changes in rules for selecting and classifying causes of death.

Statewide, regional, county, and category totals may not match due to non-inclusive categories, incomplete data, and services to Missouri non-residents.

¹ County totals for HIV and AIDS do not include persons living in correctional facilities and institutions at the time of diagnosis. Cumulative HIV cases may show declines from prior years due to their reclassification as AIDS cases.

² 1999 and 2000 data in this category are not comparable to prior years due to changes in rules for selecting and classifying causes of death.

Statewide, regional, county, and category totals may not match due to non-inclusive categories, incomplete data, and services to Missouri non-residents.

¹ County totals for HIV and AIDS do not include persons living in correctional facilities and institutions at the time of diagnosis. Cumulative HIV cases may show declines from prior years due to their reclassification as AIDS cases.

² 1999 and 2000 data in this category are not comparable to prior years due to changes in rules for selecting and classifying causes of death.

Statewide, regional, county, and category totals may not match due to non-inclusive categories, incomplete data, and services to Missouri non-residents.

¹ County totals for HIV and AIDS do not include persons living in correctional facilities and institutions at the time of diagnosis. Cumulative HIV cases may show declines from prior years due to their reclassification as AIDS cases.

² 1999 and 2000 data in this category are not comparable to prior years due to changes in rules for selecting and classifying causes of death.

Statewide, regional, county, and category totals may not match due to non-inclusive categories, incomplete data, and services to Missouri non-residents.

¹ County totals for HIV and AIDS do not include persons living in correctional facilities and institutions at the time of diagnosis. Cumulative HIV cases may show declines from prior years due to their reclassification as AIDS cases.

² 1999 and 2000 data in this category are not comparable to prior years due to changes in rules for selecting and classifying causes of death.

Statewide, regional, county, and category totals may not match due to non-inclusive categories, incomplete data, and services to Missouri non-residents.

¹ County totals for HIV and AIDS do not include persons living in correctional facilities and institutions at the time of diagnosis. Cumulative HIV cases may show declines from prior years due to their reclassification as AIDS cases.

² 1999 and 2000 data in this category are not comparable to prior years due to changes in rules for selecting and classifying causes of death.

Statewide, regional, county, and category totals may not match due to non-inclusive categories, incomplete data, and services to Missouri non-residents.

¹ County totals for HIV and AIDS do not include persons living in correctional facilities and institutions at the time of diagnosis. Cumulative HIV cases may show declines from prior years due to their reclassification as AIDS cases.

² 1999 and 2000 data in this category are not comparable to prior years due to changes in rules for selecting and classifying causes of death.

Statewide, regional, county, and category totals may not match due to non-inclusive categories, incomplete data, and services to Missouri non-residents.

¹ County totals for HIV and AIDS do not include persons living in correctional facilities and institutions at the time of diagnosis. Cumulative HIV cases may show declines from prior years due to their reclassification as AIDS cases.

² 1999 and 2000 data in this category are not comparable to prior years due to changes in rules for selecting and classifying causes of death.

Statewide, regional, county, and category totals may not match due to non-inclusive categories, incomplete data, and services to Missouri non-residents.

¹ County totals for HIV and AIDS do not include persons living in correctional facilities and institutions at the time of diagnosis. Cumulative HIV cases may show declines from prior years due to their reclassification as AIDS cases.

² 1999 and 2000 data in this category are not comparable to prior years due to changes in rules for selecting and classifying causes of death.

Statewide, regional, county, and category totals may not match due to non-inclusive categories, incomplete data, and services to Missouri non-residents.

¹ County totals for HIV and AIDS do not include persons living in correctional facilities and institutions at the time of diagnosis. Cumulative HIV cases may show declines from prior years due to their reclassification as AIDS cases.

² 1999 and 2000 data in this category are not comparable to prior years due to changes in rules for selecting and classifying causes of death.

Statewide, regional, county, and category totals may not match due to non-inclusive categories, incomplete data, and services to Missouri non-residents.

¹ County totals for HIV and AIDS do not include persons living in correctional facilities and institutions at the time of diagnosis. Cumulative HIV cases may show declines from prior years due to their reclassification as AIDS cases.

² 1999 and 2000 data in this category are not comparable to prior years due to changes in rules for selecting and classifying causes of death.

Statewide, regional, county, and category totals may not match due to non-inclusive categories, incomplete data, and services to Missouri non-residents.

¹ County totals for HIV and AIDS do not include persons living in correctional facilities and institutions at the time of diagnosis. Cumulative HIV cases may show declines from prior years due to their reclassification as AIDS cases.

² 1999 and 2000 data in this category are not comparable to prior years due to changes in rules for selecting and classifying causes of death.

Statewide, regional, county, and category totals may not match due to non-inclusive categories, incomplete data, and services to Missouri non-residents.

¹ County totals for HIV and AIDS do not include persons living in correctional facilities and institutions at the time of diagnosis. Cumulative HIV cases may show declines from prior years due to their reclassification as AIDS cases.

² 1999 and 2000 data in this category are not comparable to prior years due to changes in rules for selecting and classifying causes of death.

Statewide, regional, county, and category totals may not match due to non-inclusive categories, incomplete data, and services to Missouri non-residents.

¹ County totals for HIV and AIDS do not include persons living in correctional facilities and institutions at the time of diagnosis. Cumulative HIV cases may show declines from prior years due to their reclassification as AIDS cases.

² 1999 and 2000 data in this category are not comparable to prior years due to changes in rules for selecting and classifying causes of death.

Statewide, regional, county, and category totals may not match due to non-inclusive categories, incomplete data, and services to Missouri non-residents.

¹ County totals for HIV and AIDS do not include persons living in correctional facilities and institutions at the time of diagnosis. Cumulative HIV cases may show declines from prior years due to their reclassification as AIDS cases.

² 1999 and 2000 data in this category are not comparable to prior years due to changes in rules for selecting and classifying causes of death.

Statewide, regional, county, and category totals may not match due to non-inclusive categories, incomplete data, and services to Missouri non-residents.

¹ County totals for HIV and AIDS do not include persons living in correctional facilities and institutions at the time of diagnosis. Cumulative HIV cases may show declines from prior years due to their reclassification as AIDS cases.

² 1999 and 2000 data in this category are not comparable to prior years due to changes in rules for selecting and classifying causes of death.

Statewide, regional, county, and category totals may not match due to non-inclusive categories, incomplete data, and services to Missouri non-residents.

¹ County totals for HIV and AIDS do not include persons living in correctional facilities and institutions at the time of diagnosis. Cumulative HIV cases may show declines from prior years due to their reclassification as AIDS cases.

² 1999 and 2000 data in this category are not comparable to prior years due to changes in rules for selecting and classifying causes of death.

Statewide, regional, county, and category totals may not match due to non-inclusive categories, incomplete data, and services to Missouri non-residents.

¹ County totals for HIV and AIDS do not include persons living in correctional facilities and institutions at the time of diagnosis. Cumulative HIV cases may show declines from prior years due to their reclassification as AIDS cases.

² 1999 and 2000 data in this category are not comparable to prior years due to changes in rules for selecting and classifying causes of death.

Statewide, regional, county, and category totals may not match due to non-inclusive categories, incomplete data, and services to Missouri non-residents.
